a\License States: Where available, license state consumption is based on taxed gallons reported by state authorities. In other states, consumption is estimated from state tax collections. Beginning with 1985, a new source is used for Arizona. Also beginning in 1985, Florida special (domestic) liquor products are added into the Florida data. Finally, beginning with 1985, the monthly data for Indiana is no longer shifted while the monthly data for Tennessee & Texas are shifted to more closely reflect consumer purchases.

* For Georgia, Hawaii, Missouri, South Carolina, South Dakota and (after 1984) Wisconsin, consumption represents shipments by distillers to wholesalers. Beginning with 1985, the monthly data for these states are shifted to more closely reflect consumer purchases.

b\Control States: All control state data, with three exceptions, are package sales in retail stores and case sales to on-premise licensees.

** In Mississippi, Wyoming and (since March 1987) Iowa, consumption represents wholesale sales from state-controlled warehouses to private retail establishments.

* Defined as liquor bottled in the U.S. for domestic use and export; also U.S. liquor imports for consumption in containers holding not over 1 gallon.

a\ Through 1985 the source for data on Puerto Rican rum bottled in Puerto Rico was the Puerto Rico Rum Producers Association. Beginning with 1986, the source changed to the U.S. Census Bureau. The source for Puerto Rican rum bottled in the U.S., the Bureau of Alcohol, Tobacco & Firearms, is the same for all years.

NA – Data for 1980 are not strictly speaking comparable with 1981 and earlier year data because of reporting and definitional difficulties in the first nine months of 1980 that resulted from the change to the all-in-bond system by the U.S. Bureau of Alcohol, Tobacco & Firearms. Also for these reasons, a breakdown between domestic and imported non-whiskey liquor for 1980 is not reliable and therefore is not given.

SOURCES: Bureau of Alcohol, Tobacco and Firearms, U.S. Treasury Department; Bureau of Census, U.S. Commerce Department; Virgin Island Rum Council; Puerto Rico Rum Producers Association.

NOTE: Because of rounding, detail may not add to total. Cordials included in "Other" before 1940; Vodka included in "Other" before 1980; Tequila included in "Other before 1974; Bitters included in "Other" before 1945.

a\ Data for the years 1934 through 1978 are in tax gallons; data for 1979 and on are in proof gallons.

b\ Indicates shipments in wood or metal containers each holding more than one gallon.

c\ Substantial quantities of imported bulk rum were shifted from Customs' bonded warehouses to BATF bonded warehouses in 1984 (about 5 million gallons from Jamaica). As a result, these supplies have been described as imports for for consumption although bottling & consumption may not take place for a year or more. The shift occurred because, with passage of the Caribbean Recovery Act in 1984, rum from Carribbean nations now enters duty free. This makes storage in Customs' bonded warehouses unnecessary to defer payment of import duties.

Tax Gallon: unit of distilled spirits on which the federal excise tax (FET) is levied. The FET on all spirits is $12.50 per proof gallon so that a tax gallon is equivalent to a proof gallon. Before Jan. 1, 1980, imports of bottled distilled spirits were taxed at a rate per gallon, regardless of the proof.

Proof Gallon: standard U.S. gallon of 231 cubic inches at 60 degrees Farenheit containing 50 percent ethyl alcohol by volume (100 proof).
